THEORY OF THE INDEX: The American Chamber of Commerce Researchers Association (ACCRA) has but one purpose in developing this Index: To provide a useful and reasonably accurate measurement of inter-city cost of living differences. The items forming the basis of the Index have been carefully chosen to reflect the different categories of consumer expenditures. Weights assigned to relative costs are based on the latest government survey data on a mid-management executive family's pattern of expenditures for consumer goods and services. All items are priced at the local level by chamber of commerce research personnel at a specified time and by standard specifications, and converted to an index by programmed computer processing.

INTERPRETING THE INDEX: The ACCRA Cost of Living Index measures relative price levels for consumer goods and services in participating cities, as compared with the national average of 100 for all participating cities (metropolitan and nonmetropolitan). The ACCRA Index does not measure inflation (price change through time); each quarterly report is a separate comparison of prices at the single point in time, and both the number and the mix of cities may change from one quarter to the next.

Because the number of items priced is rather limited, it is not valid to treat percentage differences between cities as exact measures. Spreads of three or fewer index whole numbers in the All-Item Index do not represent statistically significant differences and may not correctly show which city is more expensive. Differences of more than three index whole numbers in the All-Items Index can be considered to represent actual inter-city differences in the costs of consumer goods and services; but the percentage difference in such cases should be considered a reasonable indication, rather than a precise measure, of the extent of the difference.

PARTICIPATING CITIES: The cities included in this survey are those whose chambers of commerce, or similar organizations, have volunteered to participate. The total number of respondents varies slightly from quarter to quarter, and a continuing effort is made to increase the coverage to include more metropolitan areas in the survey.

PRICE REPORTING: ACCRA reviews all prices reported and attempts to eliminate errors or non-compliance with specifications. All price data which form the basis of the Index are obtained from sources deemed reliable, but no representation is made as to the complete accuracy thereof. They are published subject to errors, omissions, changes and withdrawals without notice.

SPECIFICATIONS: The specific items priced are listed on page iii. The specifications listed for all food items are self-explanatory. The specifications listed for all non-food items are presented to the user only as a guide, since the price computations are based on extensive research within each city and in accordance with explicit specifications and procedural instructions.

EXCLUSION OF TAXES: ACCRA is fully cognizant that state and local taxes are an integral part of the cost of living, and that the burden varies considerably from state to state and even among communities in the same state. Due to the multiplicity of state and local taxes, taxing districts and assessment procedures, no adequate method exists to calculate the total tax burden for either inter-state or inter-city comparison, involving the whole range of state and local taxes levied on real and intangible property, retail sales, income and the excise taxes levied directly or indirectly on commodities.

QUARTERLY SURVEY DATA PRESENTED IN THREE SECTIONS:

- ALL-CITIES INDEX REPORT - This section arrays cities alphabetically by states and shows the Index calculated for each city's standing on the All-Items Index and on six component indexes: Groceries, Housing, Utilities, Transportation, Health Care and Misc. Goods & Services.
- METROPOLITAN CITIES INDEX REPORT - Index data are presented for participating cities within the same Metropolitan Statistical Area (MSA) or Primary Metropolitan Statistical Area (PMSA). This section is especially helpful when the central city of a metropolitan area is not represented in the Index but suburban cities are.

  While Index data for suburban cities can be used as surrogates for central city data, users should note that cost of living differences exist within large metropolitan areas, and that data for suburbs may not exactly match those which might have been obtained for a central city.
- PRICE REPORT - The prices reported by each city for all of the items in the survey are presented in alphabetical order by state. Also included is the nationwide median and average price, standard deviation and range for each item.

SUBSCRIPTIONS: The Quarterly Survey is available at a yearly subscription price of $75.00. Single copies of current or past studies are not available for distribution but may be inspected at the offices of participating chambers of commerce and at many libraries. Subscription order blanks are available from participating chambers of commerce and from the address listed above; or subscriptions may be placed directly with the ACCRA project's treasurer: Mrs. Alice Klein, c/o Louisville Area Chamber of Commerce, One Riverfront Plaza, Louisville, KY 40202.

INQUIRIES: Questions regarding the Index program, procedures or methodology may be directed to either: C.A. Kasdorf III, Houston Chamber of Commerce, 1100 Milam Bldg., 25th Floor, Houston, TX 77002 (tel. 713-658-2466) or Edward Sturgeon, Lexington Area Chamber of Commerce, 421 North Broadway, Lexington, Kentucky 40508 (tel. 606-254-4447).

The American Chamber of Commerce Researchers Association — a non-profit corporation — was founded in 1961 and its membership comprises research staff of state and local chambers of commerce throughout the United States and Canada. In its dedication to improving business information through research, and recognizing the need for a measurement of relative living costs, the INTER-CITY COST OF LIVING INDICATORS PROJECT was developed and has been published quarterly since 1968.

The organization has no permanent office, with staff functions carried on by volunteer members, most of whom hold membership in the Chamber of Commerce of the United States. The association is an affiliate of the American Chamber of Commerce Executives, 1454 Duke Street, Alexandria, Virginia 22314.

PRICE REPORT COLUMN HEADINGS

The items and specifications in this pricing study are listed below. The descriptions for HOUSING and UTILITIES are briefly highlighted, since pricing is based on explicit procedural instructions and very detailed specifications. Monthly housing payments and utility-use charges are not community-wide averages and should not be construed as such. • Pricing is based on sampling averages. The concept of a mid-management executive household is the guideline for selecting establishments and neighborhoods in which to price, and the minimum number of establishments to be surveyed depends upon the size of each community. • To ensure uniformity, national brands are stipulated whenever possible, and "lowest price" is the reported average of the lowest prices found in all stores surveyed. • Housing prices are published in whole dollars. All other items are presented in dollars and cents and published without the decimal point.

THEORY OF THE INDEX: The American Chamber of Commerce Researchers Association (ACCRA) has but one purpose in developing this Index: To provide a useful and reasonably accurate measurement of inter-city cost of living differences. The items forming the basis of the Index have been carefully chosen to reflect the different categories of consumer expenditures. Weights assigned to relative costs are based on the latest government survey data on a mid-management executive family's pattern of expenditures for consumer goods and services. All items are priced at the local level by chamber of commerce research personnel at a specified time and by standard specifications, and converted to an index by programmed computer processing.

INTERPRETING THE INDEX: The ACCRA Cost of Living Index measures relative price levels for consumer goods and services in participating cities, as compared with the national average of 100 for all participating cities (metropolitan and nonmetropolitan). The ACCRA Index does not measure inflation (price change through time); each quarterly report is a separate comparison of prices at the single point in time, and both the number and the mix of cities may change from one quarter to the next.

Because the number of items priced is rather limited, it is not valid to treat percentage differences between cities as exact measures. Spreads of three or fewer index whole numbers in the All-Item Index do not represent statistically significant differences and may not correctly show which city is more expensive. Differences of more than three index whole numbers in the All-Items Index can be considered to represent actual inter-city differences in the costs of consumer goods and services; but the percentage difference in such cases should be considered a reasonable indication, rather than a precise measure, of the extent of the difference.

PARTICIPATING CITIES: The cities included in this survey are those whose chambers of commerce, or similar organizations, have volunteered to participate. The total number of respondents varies slightly from quarter to quarter, and a continuing effort is made to increase the coverage to include more metropolitan areas in the survey.

PRICE REPORTING: ACCRA reviews all prices reported and attempts to eliminate errors or non-compliance with specifications. All price data which form the basis of the Index are obtained from sources deemed reliable, but no representation is made as to the complete accuracy thereof. They are published subject to errors, omissions, changes and withdrawals without notice.

SPECIFICATIONS: The specific items priced are listed on page iii. The specifications listed for all food items are self-explanatory. The specifications listed for all non-food items are presented to the user only as a guide, since the price computations are based on extensive research within each city and in accordance with explicit specifications and procedural instructions.

EXCLUSION OF TAXES: ACCRA is fully cognizant that state and local taxes are an integral part of the cost of living, and that the burden varies considerably from state to state and even among communities in the same state. Due to the multiplicity of state and local taxes, taxing districts and assessment procedures, no adequate method exists to calculate the total tax burden for either inter-state or inter-city comparison, involving the whole range of state and local taxes levied on real and intangible property, retail sales, income and the excise taxes levied directly or indirectly on commodities.

QUARTERLY SURVEY DATA PRESENTED IN THREE SECTIONS:

- ALL-CITIES INDEX REPORT - This section arrays cities alphabetically by states and shows the Index calculated for each city's standing on the All-Items Index and on six component indexes: Groceries, Housing, Utilities, Transportation, Health Care and Misc. Goods & Services.
- METROPOLITAN CITIES INDEX REPORT - Index data are presented for participating cities within the same Metropolitan Statistical Area (MSA) or Primary Metropolitan Statistical Area (PMSA). This section is especially helpful when the central city of a metropolitan area is not represented in the Index but suburban cities are.

  While Index data for suburban cities can be used as surrogates for central city data, users should note that cost of living differences exist within large metropolitan areas, and that data for suburbs may not exactly match those which might have been obtained for a central city.
- PRICE REPORT - The prices reported by each city for all of the items in the survey are presented in alphabetical order by state. Also included is the nationwide median and average price, standard deviation and range for each item.

SUBSCRIPTIONS: The Quarterly Survey is available at a yearly subscription price of $75.00. Single copies of current or past studies are not available for distribution but may be inspected at the offices of participating chambers of commerce and at many libraries. Subscription order blanks are available from participating chambers of commerce and from the address listed above; or subscriptions may be placed directly with the ACCRA project's treasurer: Mrs. Alice Klein, c/o Louisville Area Chamber of Commerce, One Riverfront Plaza, Louisville, KY 40202.

INQUIRIES: Questions regarding the Index program, procedures or methodology may be directed to either: C.A. Kasdorf III, Houston Chamber of Commerce, 1100 Milam Bldg., 25th Floor, Houston, TX 77002 (tel. 713-658-2466) or Edward Sturgeon, Lexington Area Chamber of Commerce, 421 North Broadway, Lexington, KY 40508 (tel. 606-254-4447).

The American Chamber of Commerce Researchers Association — a non-profit corporation — was founded in 1961 and its membership comprises research staff of state and local chambers of commerce throughout the United States and Canada. In its dedication to improving business information through research, and recognizing the need for a measurement of relative living costs, the INTER-CITY COST OF LIVING INDICATORS PROJECT was developed and has been published quarterly since 1968.

The organization has no permanent office, with staff functions carried on by volunteer members, most of whom hold membership in the Chamber of Commerce of the United States. The association is an affiliate of the American Chamber of Commerce Executives, 1454 Duke Street, Alexandria, Virginia 22314.

PRICE REPORT COLUMN HEADINGS

The items and specifications in this pricing study are listed below. The descriptions for HOUSING and UTILITIES are briefly highlighted, since pricing is based on explicit procedural instructions and very detailed specifications. Monthly housing payments and utility-use charges are not community-wide averages and should not be construed as such. • Pricing is based on sampling averages. The concept of a mid-management executive household is the guideline for selecting establishments and neighborhoods in which to price, and the minimum number of establishments to be surveyed depends upon the size of each community. • To ensure uniformity, national brands are stipulated whenever possible, and "lowest price" is the reported average of the lowest prices found in all stores surveyed. • Housing prices are published in whole dollars. All other items are presented in dollars and cents and published without the decimal point.

THEORY OF THE INDEX: The American Chamber of Commerce Researchers Association (ACCRA) has but one purpose in developing this Index: To provide a useful and reasonably accurate measurement of inter-city cost of living differences. The items forming the basis of the Index have been carefully chosen to reflect the different categories of consumer expenditures. Weights assigned to relative costs are based on the latest government survey data on a mid-management executive family's pattern of expenditures for consumer goods and services. All items are priced at the local level by chamber of commerce research personnel at a specified time and by standard specifications, and converted to an index by programmed computer processing.

INTERPRETING THE INDEX: The ACCRA Cost of Living Index measures relative price levels for consumer goods and services in participating cities, as compared with the national average of 100 for all participating cities (metropolitan and nonmetropolitan). The ACCRA Index does not measure inflation (price change through time); each quarterly report is a separate comparison of prices at the single point in time, and both the number and the mix of cities may change from one quarter to the next.

Because the number of items priced is rather limited, it is not valid to treat percentage differences between cities as exact measures. Spreads of three or fewer index whole numbers in the All-Item Index do not represent statistically significant differences and may not correctly show which city is more expensive. Differences of more than three index whole numbers in the All-Items Index can be considered to represent actual inter-city differences in the costs of consumer goods and services; but the percentage difference in such cases should be considered a reasonable indication, rather than a precise measure, of the extent of the difference.

PARTICIPATING CITIES: The cities included in this survey are those whose chambers of commerce, or similar organizations, have volunteered to participate. The total number of respondents varies slightly from quarter to quarter, and a continuing effort is made to increase the coverage to include more metropolitan areas in the survey.

PRICE REPORTING: ACCRA reviews all prices reported and attempts to eliminate errors or non-compliance with specifications. All price data which form the basis of the Index are obtained from sources deemed reliable, but no representation is made as to the complete accuracy thereof. They are published subject to errors, omissions, changes and withdrawals without notice.

SPECIFICATIONS: The specific items priced are listed on page iii. The specifications listed for all food items are self-explanatory. The specifications listed for all non-food items are presented to the user only as a guide, since the price computations are based on extensive research within each city and in accordance with explicit specifications and procedural instructions.

EXCLUSION OF TAXES: ACCRA is fully cognizant that state and local taxes are an integral part of the cost of living, and that the burden varies considerably from state to state and even among communities in the same state. Due to the multiplicity of state and local taxes, taxing districts and assessment procedures, no adequate method exists to calculate the total tax burden for either inter-state or inter-city comparison, involving the whole range of state and local taxes levied on real and intangible property, retail sales, income and the excise taxes levied directly or indirectly on commodities.

QUARTERLY SURVEY DATA PRESENTED IN THREE SECTIONS:

- ALL-CITIES INDEX REPORT - This section arrays cities alphabetically by states and shows the Index calculated for each city's standing on the All-Items Index and on six component indexes: Groceries, Housing, Utilities, Transportation, Health Care and Misc. Goods & Services.
- METROPOLITAN CITIES INDEX REPORT - Index data are presented for participating cities within the same Metropolitan Statistical Area (MSA) or Primary Metropolitan Statistical Area (PMSA). This section is especially helpful when the central city of a metropolitan area is not represented in the Index but suburban cities are.

  While Index data for suburban cities can be used as surrogates for central city data, users should note that cost of living differences exist within large metropolitan areas, and that data for suburbs may not exactly match those which might have been obtained for a central city.
- PRICE REPORT - The prices reported by each city for all of the items in the survey are presented in alphabetical order by state. Also included is the nationwide median and average price, standard deviation and range for each item.

SUBSCRIPTIONS: The Quarterly Survey is available at a yearly subscription price of $75.00. Single copies of current or past studies are not available for distribution but may be inspected at the offices of participating chambers of commerce and at many libraries. Subscription order blanks are available from participating chambers of commerce and from the address listed above; or subscriptions may be placed directly with the ACCRA project's treasurer: Mrs. Alice Klein, c/o Louisville Area Chamber of Commerce, One Riverfront Plaza, Louisville, KY 40202.

INQUIRIES: Questions regarding the Index program, procedures or methodology may be directed to either: C.A. Kasdorf III, Houston Chamber of Commerce, 1100 Milam Bldg., 25th Floor, Houston, TX 77002 (tel. 713-658-2466) or Edward Sturgeon, Lexington Area Chamber of Commerce, 421 North Broadway, Lexington, KY 40508 (tel. 606-254-4447).

The American Chamber of Commerce Researchers Association — a non-profit corporation — was founded in 1961 and its membership comprises research staff of state and local chambers of commerce throughout the United States and Canada. In its dedication to improving business information through research, and recognizing the need for a measurement of relative living costs, the INTER-CITY COST OF LIVING INDICATORS PROJECT was developed and has been published quarterly since 1968.

The organization has no permanent office, with staff functions carried on by volunteer members, most of whom hold membership in the Chamber of Commerce of the United States. The association is an affiliate of the American Chamber of Commerce Executives, 1454 Duke Street, Alexandria, Virginia 22314.

Price Report Column Headings

The items and specifications in this pricing study are listed below. The descriptions for HOUSING and UTILITIES are briefly highlighted, since pricing is based on explicit procedural instructions and very detailed specifications. Monthly housing payments and utility-use charges are not community-wide averages and should not be construed as such. • Pricing is based on sampling averages. The concept of a mid-management executive household is the guideline for selecting establishments and neighborhoods in which to price, and the minimum number of establishments to be surveyed depends upon the size of each community. • To ensure uniformity, national brands are stipulated whenever possible, and "lowest price" is the reported average of the lowest prices found in all stores surveyed. • Housing prices are published in whole dollars. All other items are presented in dollars and cents and published without the decimal point.

THEORY OF THE INDEX: The American Chamber of Commerce Researchers Association (ACCRA) has but one purpose in developing this Index: To provide a useful and reasonably accurate measurement of inter-city cost of living differences. The items forming the basis of the Index have been carefully chosen to reflect the different categories of consumer expenditures. Weights assigned to relative costs are based on the latest government survey data on a mid-management executive family's pattern of expenditures for consumer goods and services. All items are priced at the local level by chamber of commerce research personnel at a specified time and by standard specifications, and converted to an index by programmed computer processing.

INTERPRETING THE INDEX: The ACCRA Cost of Living Index measures relative price levels for consumer goods and services in participating cities, as compared with the national average of 100 for all participating cities (metropolitan and nonmetropolitan). The ACCRA Index does not measure inflation (price change through time); each quarterly report is a separate comparison of prices at the single point in time, and both the number and the mix of cities may change from one quarter to the next.

Because the number of items priced is rather limited, it is not valid to treat percentage differences between cities as exact measures. Spreads of three or fewer index whole numbers in the All-Item Index do not represent statistically significant differences and may not correctly show which city is more expensive. Differences of more than three index whole numbers in the All-Items Index can be considered to represent actual inter-city differences in the costs of consumer goods and services; but the percentage difference in such cases should be considered a reasonable indication, rather than a precise measure, of the extent of the difference.

PARTICIPATING CITIES: The cities included in this survey are those whose chambers of commerce, or similar organizations, have volunteered to participate. The total number of respondents varies slightly from quarter to quarter, and a continuing effort is made to increase the coverage to include more metropolitan areas in the survey.

PRICE REPORTING: ACCRA reviews all prices reported and attempts to eliminate errors or non-compliance with specifications. All price data which form the basis of the Index are obtained from sources deemed reliable, but no representation is made as to the complete accuracy thereof. They are published subject to errors, omissions, changes and withdrawals without notice.

SPECIFICATIONS: The specific items priced are listed on page iii. The specifications listed for all food items are self-explanatory. The specifications listed for all non-food items are presented to the user only as a guide, since the price computations are based on extensive research within each city and in accordance with explicit specifications and procedural instructions.

EXCLUSION OF TAXES: ACCRA is fully cognizant that state and local taxes are an integral part of the cost of living, and that the burden varies considerably from state to state and even among communities in the same state. Due to the multiplicity of state and local taxes, taxing districts and assessment procedures, no adequate method exists to calculate the total tax burden for either inter-state or inter-city comparison, involving the whole range of state and local taxes levied on real and intangible property, retail sales, income and the excise taxes levied directly or indirectly on commodities.

QUARTERLY SURVEY DATA PRESENTED IN THREE SECTIONS:

- ALL-CITIES INDEX REPORT - This section arrays cities alphabetically by states and shows the Index calculated for each city's standing on the All-Items Index and on six component indexes: Groceries, Housing, Utilities, Transportation, Health Care and Misc. Goods & Services.
- METROPOLITAN CITIES INDEX REPORT - Index data are presented for participating cities within the same Metropolitan Statistical Area (MSA) or Primary Metropolitan Statistical Area (PMSA). This section is especially helpful when the central city of a metropolitan area is not represented in the Index but suburban cities are.

  While Index data for suburban cities can be used as surrogates for central city data, users should note that cost of living differences exist within large metropolitan areas, and that data for suburbs may not exactly match those which might have been obtained for a central city.
- PRICE REPORT - The prices reported by each city for all of the items in the survey are presented in alphabetical order by state. Also included is the nationwide median and average price, standard deviation and range for each item.

SUBSCRIPTIONS: The Quarterly Survey is available at a yearly subscription price of $75.00. Single copies of current or past studies are not available for distribution but may be inspected at the offices of participating chambers of commerce and at many libraries. Subscription order blanks are available from participating chambers of commerce and from the address listed above; or subscriptions may be placed directly with the ACCRA project's treasurer: Mrs. Alice Klein, c/o Louisville Area Chamber of Commerce, One Riverfront Plaza, Louisville, KY 40202.

INQUIRIES: Questions regarding the Index program, procedures or methodology may be directed to either: C.A. Kasdorf III, Houston Chamber of Commerce, 1100 Milam Bldg., 25th Floor, Houston, TX 77002 (tel. 713-658-2466) or Edward Sturgeon, Lexington Area Chamber of Commerce, 421 North Broadway, Lexington, KY 40508 (tel. 606-254-4447).

The American Chamber of Commerce Researchers Association — a non-profit corporation — was founded in 1961 and its membership comprises research staff of state and local chambers of commerce throughout the United States and Canada. In its dedication to improving business information through research, and recognizing the need for a measurement of relative living costs, the INTER-CITY COST OF LIVING INDICATORS PROJECT was developed and has been published quarterly since 1968.

The organization has no permanent office, with staff functions carried on by volunteer members, most of whom hold membership in the Chamber of Commerce of the United States. The association is an affiliate of the American Chamber of Commerce Executives, 1454 Duke Street, Alexandria, Virginia 22314.

Price Report Column Headings

The items and specifications in this pricing study are listed below. The descriptions for HOUSING and UTILITIES are briefly highlighted, since pricing is based on explicit procedural instructions and very detailed specifications. Monthly housing payments and utility-use charges are not community-wide averages and should not be construed as such. • Pricing is based on sampling averages. The concept of a mid-management executive household is the guideline for selecting establishments and neighborhoods in which to price, and the minimum number of establishments to be surveyed depends upon the size of each community. • To ensure uniformity, national brands are stipulated whenever possible, and "lowest price" is the reported average of the lowest prices found in all stores surveyed. • Housing prices are published in whole dollars. All other items are presented in dollars and cents and published without the decimal point.
